

A4-3/APA-230

22 October 1946.

From: The Radiological Safety Officer, Com-TWELVE.
To: The Commanding Officer, U.S.S. ROCKINGHAM (APA-230).
Subject: Radiological Decontamination.

1. Based on the radiological resurvey made of the U.S.S. ROCKINGHAM upon the ship's return from a decontamination trip at sea the following items remain that require decontamination:

- (1) #1 and #2 auxiliary condensers (including overboards and outlets).
- (2) #1 and #2 lube oil coolers.
- (3) #1, #2, and #3 generator lube oil coolers.
- (4) #1, #2, #3, and #4 fresh condensers.
- (5) #1 and #2 evaporators with distiller condensers chain and chain lockers.
- (6) Crew's head 2-47-1, A304L Fr. 44 inlet to trough.
- (7) Troop toilet and showers 1-27-1, A102-1 inlet to after trough Fr. 31.
- (8) Troop toilet and showers 1-27-1, A102-1 inlet to center trough Fr. 27.
- (9) Troop toilet and showers 1-27-1, A102-1 forward trough Fr. 21 & 24.

2. On completion of this work in whole or in part request remonitoring from the Radiological Safety Officer, SanFran Naval Shipyard.

W.E. WALSH.

R.K. SHOT,
By direction.
